

Medical Trials Analysis, a CRO responsible for the planning and management of international clinical trials, in order to potentiate the operational team is looking for a **CLINICAL RESEARCH ASSOCIATE (CRA)**.

MISSION

The CRA job involves all the activities related to selection, setting up, follow up, termination and archiving of clinical trials at investigational sites. The role of CRA requires liaising with study staff at investigational sites, independent Ethics Committee, Regulatory Authorities and our Company referents to assure trials proceeding according to project specificities, possibly anticipate, identify and resolve site issues and provide regular project status updates.

JOB DESCRIPTION

The role responsibilities will include:

- Assuring extensive and detailed knowledge of study protocol, specific requirements and applicable SOPs through the study.
- Supporting study team members in setting up, perform and complete study activities both at the local and central level.
- Preparation and accurate maintenance of site specific study documentation both for site and company/sponsor use, ensuring that the documentation is complete, current, accurate and when required, adequately translated through the study.
- Performing site feasibility and conducting site visits.
